SUMMARY

Software engineer with 4+ years of experience building web, mobile, and trading systems end to end:
the backend that holds the data, the apps people use, and the infrastructure that keeps them running.
20+ projects delivered for businesses across regions. Focused on real-time systems, crypto, and automation.

EXPERIENCE

Estedio Global Technologies - Full Stack / Frontend Engineering
Product engineering across web surfaces and supporting services.

Bidbox Community - Full Stack Engineer
End-to-end delivery on community and marketplace systems.

SELECTED PROJECTS

Bidbox Global - automated crypto trading platform with bots, live analytics, and trade-only exchange keys.
Exporiq - export intelligence platform for Indonesian SMEs: markets, buyers, costing, documents, shipments.
Garut English Course - course website with programs, pricing, and FAQ (Next.js).
Ramona Aluminium - fabrication company profile and measured product catalog (Next.js).
Cipark - pine-forest cafe and glamping destination site (Next.js).
